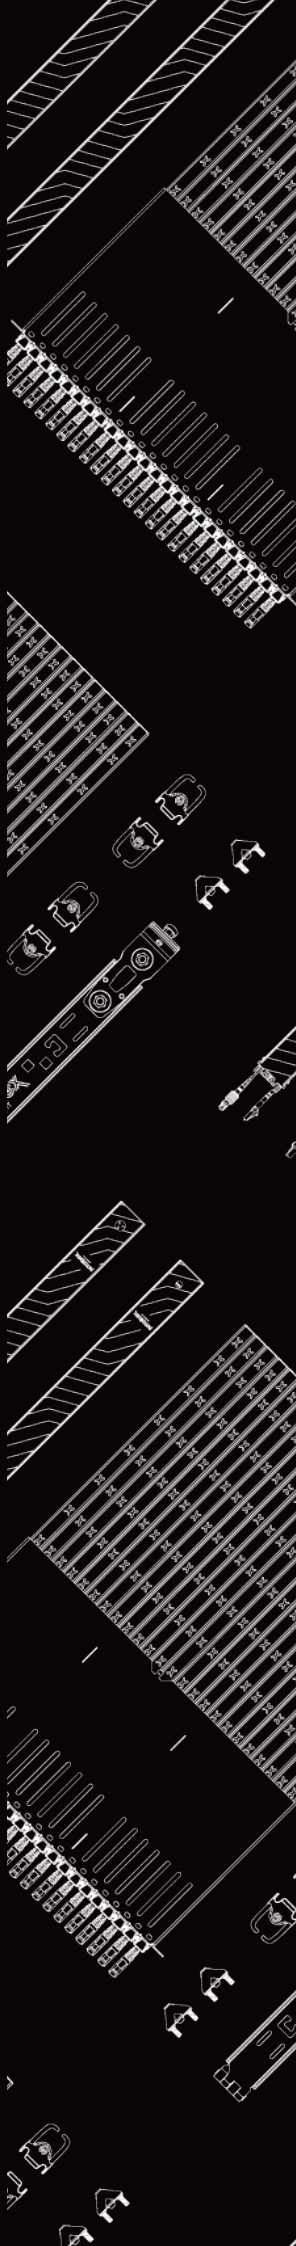
Patchcatch Solo (24 Pack)

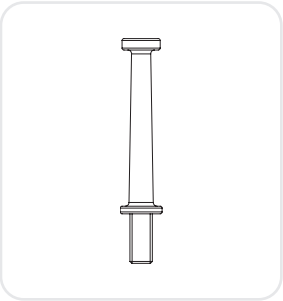


Patchcatch Solo

The Patchcatch Solo is 0RU Cable Management Tool that fastens your device while at the same time managing your cables. One 24-Pack replaces 48 conventional cage nut screws as well as 12 cable managers, therefore allowing you to use up to 50% more rack space. Ideal for server cabinets with limited space around the rails, the Patchcatch Solo enables you to manage your cables on the front sides of the rack without wasting a rack unit. The Patchcatch Solo is compatible with conventional M6 cage nuts, the PATCHBOX /dev/mount, and the Mounting Rails of the patchbox.one. One 24-pack of Patchcatch Solo allows you to manage cables and fasten hardware of 12 rack units.

10 Years of Warranty

Items included



48 x Patchcatch Solo
